PROFESSIONAL SUMMARY

Detail-oriented Data Annotation professional with 1+ year of hands-on experience in text annotation, image annotation, audio annotation and transcription, and LiDAR data annotation for AI/ML datasets. Skilled in reviewing annotated datasets for accuracy and quality, ensuring compliance with project guidelines, and providing corrective feedback to annotation teams. Experienced in verbatim and clean-verbatim audio transcription, speaker diarization, and timestamping for speech datasets. Experienced in maintaining high productivity benchmarks and collaborating with Quality Leads to uphold annotation standards across large-scale datasets.

SKILLS

Data Annotation & Review: Text Annotation, Image Annotation (Bounding Boxes, Cuboids), Audio Annotation, Audio Transcription (Verbatim & Clean Verbatim), Speaker Diarization, Timestamping, LiDAR 3D Point Cloud Annotation, Annotation Quality Review, Dataset Accuracy Validation

AI/ML Tools: AWS SageMaker (Data Labeling), Understanding of AI/ML Dataset Pipelines

Programming & Data: Python, SQL, Pandas, NumPy, Matplotlib

Visualization: Power BI, Tableau, DAX

Soft Skills: Attention to Detail, Analytical Thinking, Team Collaboration, Problem Solving, Rotational Shift Availability

EXPERIENCE

Analyst — *ObjectWays Technologies, Coimbatore, India*

Apr 2024 – Mar 2025

- Reviewed and validated annotated text datasets for NLP models using AWS SageMaker, ensuring accuracy and compliance with project guidelines, improving overall model performance by 20%.
- Conducted quality review of image annotation tasks (2D and 3D bounding boxes, cuboids), identified errors, and provided corrective feedback to annotation team members, enhancing model training efficiency by 15%.
- Transcribed and reviewed audio recordings for speech and sound classification models, producing accurate verbatim and clean-verbatim transcripts with correct speaker diarization and timestamping.
- Reviewed audio annotation datasets against transcription guidelines, verifying transcription accuracy, label consistency, and adherence to style/formatting standards to support high-quality AI/ML training data.
- Performed quality checks on LiDAR 3D point cloud annotations, ensuring spatial accuracy of cuboid labels across large datasets, resulting in a 10% improvement in object detection accuracy.
- Maintained high productivity and quality benchmarks by streamlining data validation workflows, reducing annotation processing time by 25%.
- Collaborated with Quality Leads and Operations Teams to enforce annotation and transcription standards and resolve labeling inconsistencies across multiple concurrent projects.

PROJECTS

Power BI Dashboard for Sales Analysis | *Power BI, DAX, Power Query*

- Developed an interactive Power BI dashboard analyzing sales performance, customer trends, and regional breakdowns, improving decision-making efficiency by 30% through automated real-time reporting.
- Built DAX-calculated KPIs and interactive visualizations; used Power Query for data cleaning and transformation across multiple data sources.

MEDROBO – Medicine Delivery Robot Prototype | *IoT, Robotics, Navigation Sensors*

- Developed and successfully completed an autonomous medicine delivery robot prototype integrating navigation sensors for obstacle avoidance, collaborating with an engineering team to test, validate, and finalize system reliability.

EDUCATION

Bachelor of Engineering (Electronics and Communication Engineering) — Hindustan Institute of Technology, Coimbatore | **2020–2024**

Intermediate (MPC) — Sri Chaitanya Junior College, Andhra Pradesh | **2018–2020**

SSC — Sri Nalanda High School, Andhra Pradesh | **2017–2018**

CERTIFICATIONS

- Data Science and Big Data Analytics – Capgemini (2024)
- NXT Wave – Fly High Challenge (2022)
- Data Analytics Training – Nyeras Edu-Tech and Innovations Pvt. Ltd (2025)

ADDITIONAL INFORMATION

Languages: English (Fluent), Hindi (Conversational), Telugu (Native)
